

Goal 2 Build Outcome

1. Additional parts needed:
 - 3 Prong switch:
<http://www.canadarobotix.com/mechanical-switches/1480-dpdt-slide-switch-3a-125v>
(or just scavenged from somewhere)
 - Headphone jack:
<http://www.canadarobotix.com/cables-wires/audio-jack-3-5-mm>
2. Build Pictures: Pages 2-6
 - Page2: Diagram
 - Page3: Build picture.
3. Problems encountered/Solutions: Pages 6-7
 - Gap between front and back ends
 - Does not close that well
 - Audio issues
4. Lessons Learned: Page 7
 - Drill press required
 - function buttons without NinjaFlex plastic filament

Potential Improvement

-May use an audio jack breakout in future revision (although a switch is easier to get a hold of).
